BUSINESS MODEL

LUBRICANTS

Unique FUCHS business model based on strict application focus and tailormade solutions

INNOVATION ENABLER

FUCHS has the solutions to help customers with their technology transformation

MEGATRENDS

E-MOBILITY

Significant opportunities for FUCHS in fast developing markets

SUSTAINABILITY

FUCHS empowers its customers to perform more sustainably

DIGITALIZATION

FUCHS GOES DIGITAL as a basis for smart services, operational excellence and Business Model Innovation

GROWTH

GROWTH

FUCHS will exploit growth opportunities leading to an EBIT of €500 mn by 2025

UNIQUE BUSINESS MODEL BASED ON STRICT APPLICATION FOCUS AND TAILORMADE SOLUTIONS

THE PRINCIPAL DUTIES OF A LUBRICANT:

ENSURE THE EFFICIENT OPERATION AND PRESERVATION OF MOVING PARTS

Reduce friction and wear in moving systems

Separate surfaces and protect from wear

Cool machinery and equipment

Protect surfaces from corrosion

Transfer energy

LUBRICANTS ENABLE INNOVATION

FUCHS HAS THE SOLUTIONS TO HELP CUSTOMERS WITH THEIR TECHNOLOGY TRANSFORMATION

E-MOBILITY

LUBRICANTS. TECHNOLOGY. PEOPLE.

SIGNIFICANT OPPORTUNITIES IN FAST-GROWING MARKETS

Mobility change is on a fast track: today main focus on batteries

~ \$3bn of new market for functional fluids of which we see on a conservative basis 50% relevant for FUCHS. E-lyte and cooling fluids are examples for FUCHS activities in this field.

Mobility change comes with additional requirements for lubricants: good news for FUCHS' high-performance product

Globally the number of combustion engines will increase over the course of the next 10 years:
European market to decline, growth (number of vehicles) especially in China.

E-mobility is a net opportunity with significant growth opportunities for the FUCHS Group.

SUSTAINABILITY

FUCHS EMPOWERS ITS CUSTOMERS TO PERFORM MORE SUSTAINABLY

FUCHS drives sustainability along the entire value chain

We empower our customers to perform more sustainably leading to greater efficiency and additional value potentials

Lubricants are by nature a contributor to lower the CO₂ footprint along the entire value chain

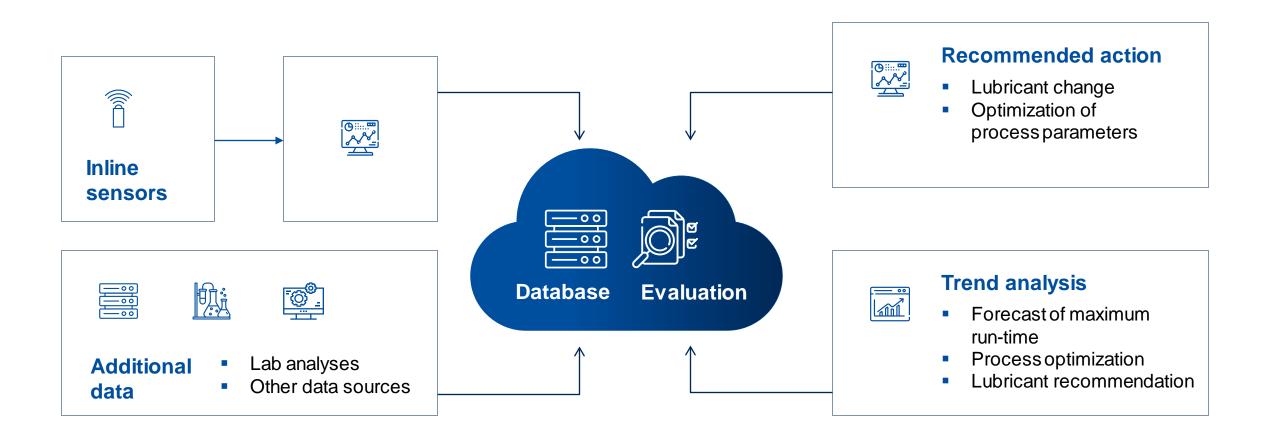

The basic idea of sustainability comes with additional requirements for lubricants: good news for FUCHS' high-performance products

FUCHS products play a decisive role to help customers lower their CO₂ footprint.

DIGITILIZATION

FUCHS GOES DIGITAL AS A BASIS FOR SMART SERVICES, OPERATIONAL EXCELLENCE AND BUSINESS MODEL INNOVATION

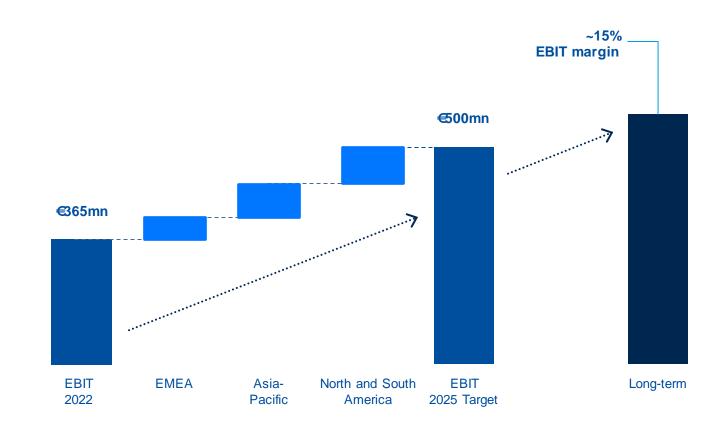

GROWTH

FUCHS WILL EXPLOIT GROWTH OPPORTUNITIES LEADING TO AN EBIT OF €500 MN BY 2025

Growth

- Construction of new plants in growth regions
- Capacity expansion of existing plants

Technology

- Modernization of plants to the highest technological standards
- Building specialty grease plants for new products related to the global megatrends sustainability and e-mobility

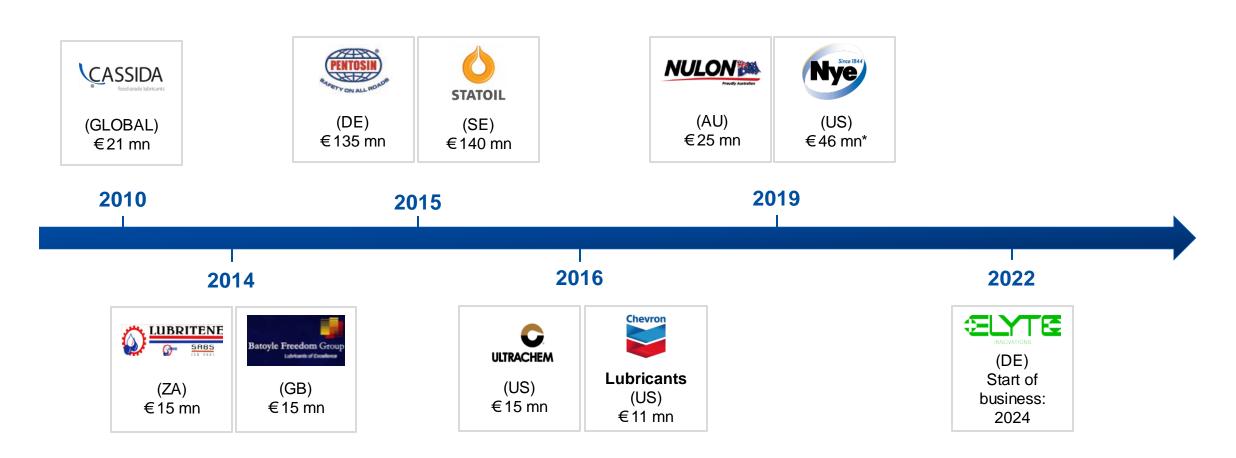

Innovation

 Establishing three R&D hubs in China, Germany and the U.S. at the same level

ECOLOGICAL SUSTAINABILITY @ FUCHS

PARTNERING WITH THE COMPLETE VALUE CHAIN

Thanks to our lubricants, machines run more efficiently, which in turn increases their efficiency and lifetime.

For example, FUCHS proved with an excavator operated for 8,000 hours that the use of a premium hydraulic oil saves about 9,600 liters of diesel.

This corresponds to a CO₂-equivalent of nearly 30 tons.

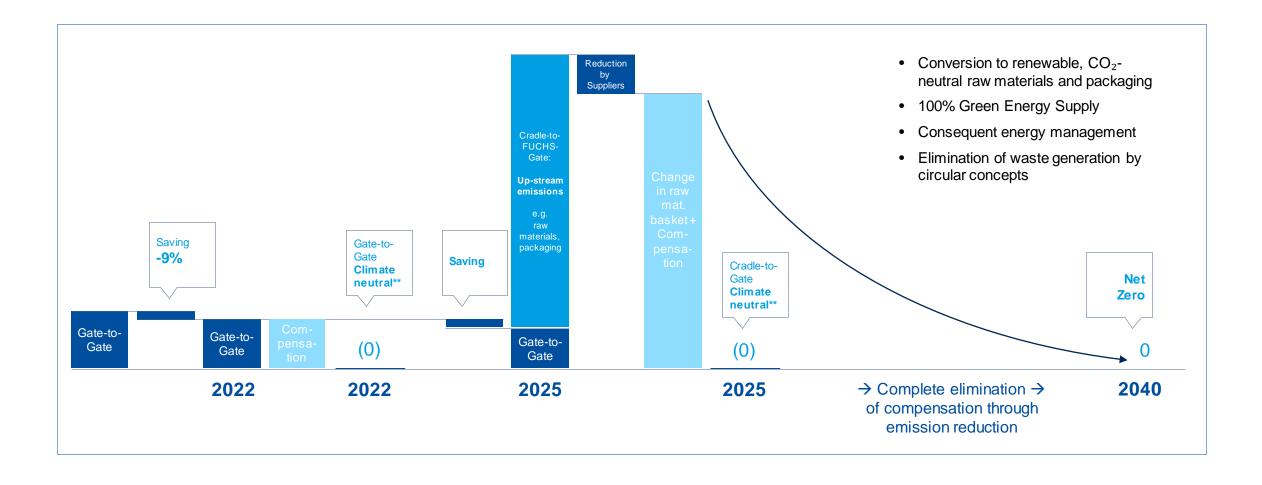

FUCHS is constantly setting new standards with research partners and suppliers. FUCHS is providing solutions for sustainability in the industry.

SUSTAINABILITY DRIVES NEW TECHNOLOGIES

E-MOBILITY - THE SOURCE OF NEW OPPORTUNITIES

EUROPE

| 52 MOVING YOUR WORLD

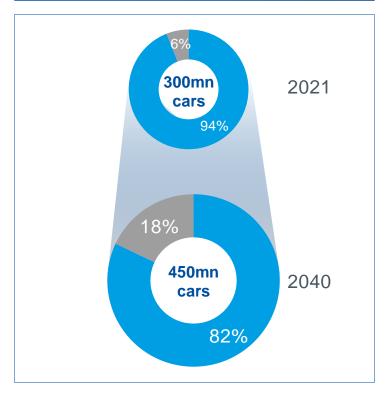

E-MOBILITY RAMP UP SCENARIO: CHINA

Car sales

Car population

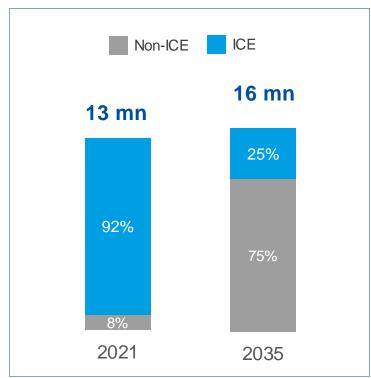

- Strong increase in car sales and car population in China
- Openness in technology leading to more balanced split between ICE and non-ICE
- Even with a fast-growing share of BEVs, there will be more combustion engines in 2040 than today
- Implication on lubricant volumes:
 - current automotive market China
 ~3.5mt
 - ~1/3 bigger lubricant market including efficiency gains leads to volume increase of ~800kt

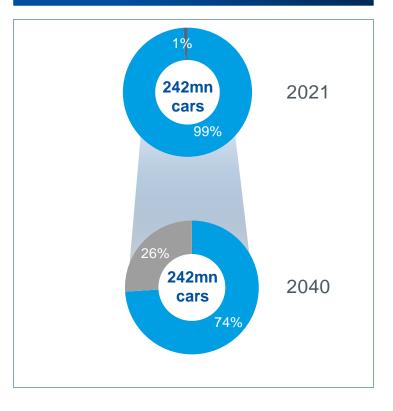

E-MOBILITY RAMP UP SCENARIO: EUROPE

Car sales

Car population

- Regulation in Europe will lead to ban of ICE cars between 2030 – 2040
- Overall car population expected to be largely stable
- Assumption: avg. 5 Mio. additional BEVs/year on the road till 2035
- Implication on lubricant volumes:
 - Current total European market ~5.8mt
 - Volume reduction of automotive passenger car market by around 25%
 - Heavy-duty segment (~50% of automotive) expected to be stable
 - Volume decline by ~700kt

Assumption: Full loss of car lubricants (MWF, grease,...)

E-MOBILITY SCENARIO: USA

No clear path forward

Expected impact on the market very limited in the coming years

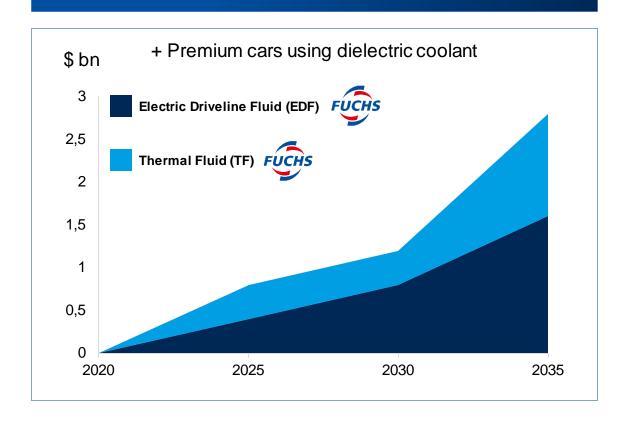

Expectation no significant influence through e-mobility

MARKET IMPACT NEW OPPORTUNITIES

Electrolyte market opens up significant business potential

Strong increase in demand especially in Europe

Small to medium volume products - design to application

Therefore JV with E-Lyte to enter into this market segment – it is part of the drivetrain fluids – transfer of energy

We focus on high performance electrolytes, not on standard high volume market of traction batteries

E-Lyte product performance is unique to support, i. e. fast loading cycles

Perfect fit between E-Lyte and FUCHS – high technology meets high technology and industrial experience

The information contained in this presentation is for background purposes only and is subject to amendment, revision and updating. Certain statements and information contained in this presentation may relate to future expectations and other forward-looking statements that are based on management's current views and assumptions and involve known and unknown risks and uncertainties. In addition to statements which are forward-looking by reason of context, including without limitation, statements referring to risk limitations, operational profitability, financial strength, performance targets, profitable growth opportunities, and risk adequate pricing, other words such as "may, will, should, expects, plans, intends, anticipates, believes, estimates, predicts, or continue", "potential, future, or further", and similar expressions identify forward-looking statements.

By their very nature, forward-looking statements involve a number of risks, uncertainties and assumptions which could cause actual results or events to differ materially from those expressed or implied by the forward-looking statements. These factors can include, among other factors, changes in the overall economic climate, procurement prices, changes to exchange rates and interest rates, and changes in the lubricants industry. FUCHS PETROLUB SE provides no guarantee that future developments and the results actually achieved in the future will match the assumptions and estimates set out in this presentation and assumes no liability for such. Statements contained in this presentation regarding past trends or activities should not be taken as a representation that such trends or activities will continue in the future.

The company does not undertake any obligation to update or revise any statements contained in this presentation, whether as a result of new information, future events or otherwise. In particular, you should not place undue reliance on forward-looking statements, which speak only as of the date of this presentation.
