E-MOBILITY

SIGNIFICANT OPPORTUNITIES IN FAST-GROWING MARKETS

Mobility change is on a fast track: today main focus on batteries

~ \$3bn of new market for functional fluids of which we see on a conservative basis 50% relevant for FUCHS. E-lyte and cooling fluids are examples for FUCHS activities in this field.

Mobility change comes with additional requirements for lubricants: good news for FUCHS' high-performance product

Globally the number of combustion engines will increase over the course of the next 10 years:
European market to decline, growth (number of vehicles) especially in China.

E-mobility is a net opportunity with significant growth opportunities for the FUCHS Group.

ECOLOGICAL SUSTAINABILITY @ FUCHS

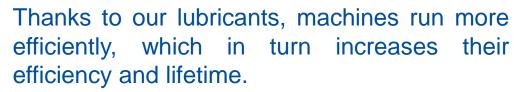

PARTNERING WITH THE COMPLETE VALUE CHAIN

For example, FUCHS proved with an excavator operated for 8,000 hours that the use of a premium hydraulic oil saves about 9,600 liters of diesel.

This corresponds to a CO₂-equivalent of nearly 30 tons.

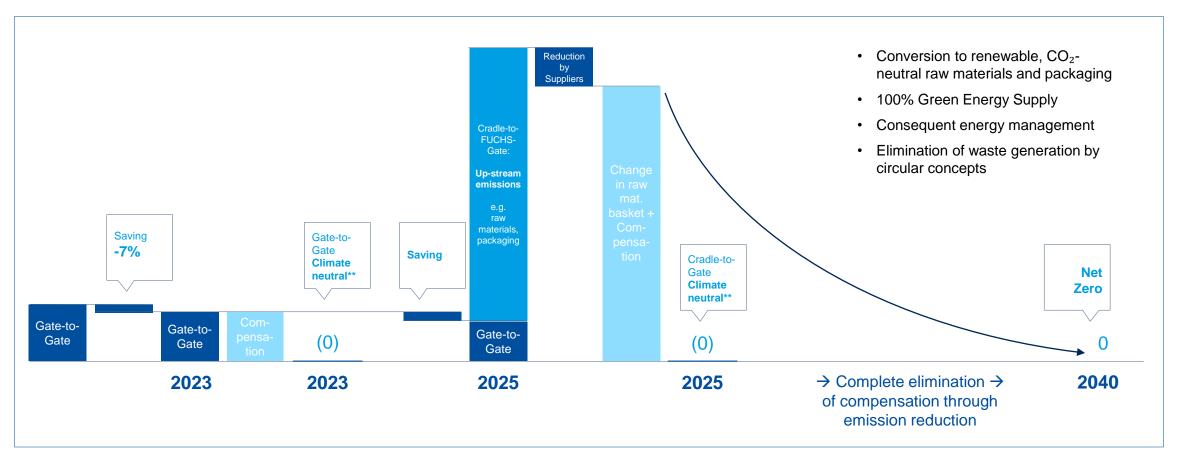

FUCHS is constantly setting new standards with research partners and suppliers. FUCHS is providing solutions for sustainability in the industry.

SUSTAINABILITY DRIVES NEW TECHNOLOGIES

E-MOBILITY – THE SOURCE OF NEW OPPORTUNITIES

Primary target for e-mobility is passenger car and light duty

Heavy duty and stationary engines will follow very slowly – long haul and offroad is not feasable or inefficient

What does it mean to the markets in the light of the today's situation

CHINA

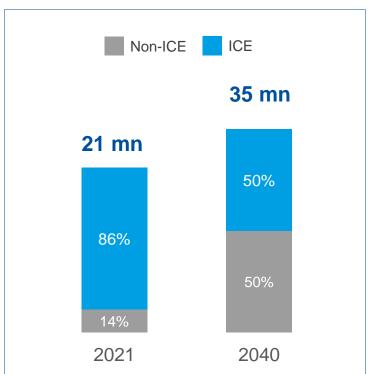

US

EUROPE

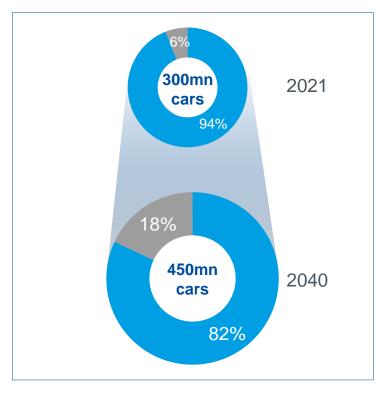

E-MOBILITY RAMP UP SCENARIO: CHINA

Car sales

Car population

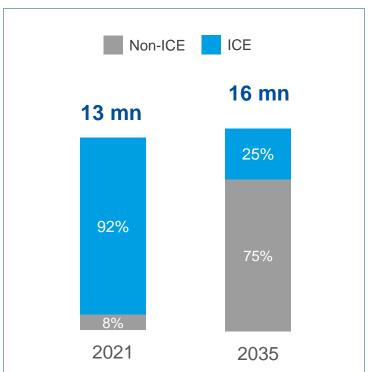

- Strong increase in car sales and car population in China
- Openness in technology leading to more balanced split between ICE and non-ICE
- Even with a fast-growing share of BEVs, there will be more combustion engines in 2040 than today
- Implication on lubricant volumes:
 - current automotive market China
 ~3.5mt
 - ~1/3 bigger lubricant market including efficiency gains leads to volume increase of ~800kt

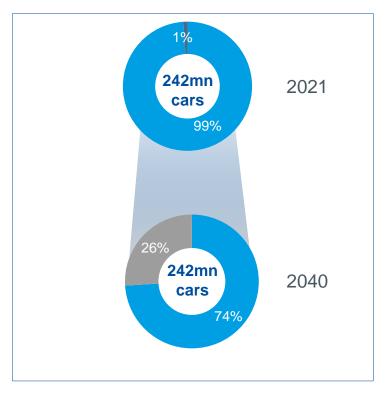

E-MOBILITY RAMP UP SCENARIO: EUROPE

Car sales

Car population

- Regulation in Europe will lead to ban of ICE cars between 2030 – 2040
- Overall car population expected to be largely stable
- Assumption: avg. 5 Mio. additional BEVs/year on the road till 2035
- Implication on lubricant volumes:
 - Current total European market ~5.8mt
 - Volume reduction of automotive passenger car market by around 25%
 - Heavy-duty segment (~50% of automotive) expected to be stable
 - Volume decline by ~700kt

Assumption: Full loss of car lubricants (MWF, grease,...)

E-MOBILITY SCENARIO: USA

No clear path forward

Expected impact on the market very limited in the coming years

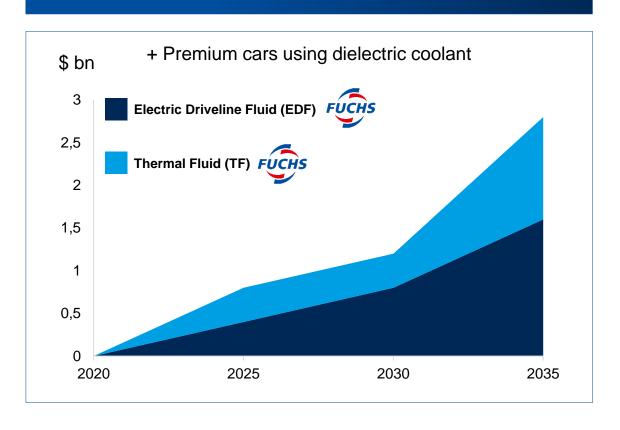

Expectation no significant influence through e-mobility

MARKET IMPACT NEW OPPORTUNITIES

Electrolyte market opens up significant business potential

Strong increase in demand especially in Europe

Small to medium volume products - design to application

Therefore JV with E-Lyte to enter into this market segment – it is part of the drivetrain fluids – transfer of energy

We focus on high performance electrolytes, not on standard high volume market of traction batteries

E-Lyte product performance is unique to support, i. e. fast loading cycles
