- E-Mobility
- Sustainability
- Digitalization

E-MOBILITY

E-MOBILITY RAMP UP SCENARIO: EUROPE

Annual car sales

Car population

- Current regulation in Europe will lead to sales ban of ICE vehicles in 2035, shift of legislation to 2040+ in discussion
- Overall, the car population expected to be largely stable with a steadily growing share of BEVs and PHEVs
- BEV outlook slightly decreased in short-term due to currently lower demand
- PHEV with slight increase recently as bridging alternative for customers
- H2 & Fuel Cell with lower relevance in PC market

E-MOBILITY RAMP UP SCENARIO: CHINA

Annual car sales

Car population

- Strong increase in car sales and car population in China expected
- Openness in technology leading to more balanced split between ICE and non-ICE
- Pure ICE sales will come to a halt in 2035 based on current regulation with strong gains for PHEV and BEV
- BEV sales share will increase significantly in long-term
- PHEV with strong recent increase and stable high share in mid/ long-term; strong government and OEM push
- Even with a fast-growing share of BEVs & PHEVs, there will be more combustion engines in operation in 2040 than today

E-MOBILITY RAMP UP SCENARIO: USA

Annual car sales

Car population

- More uncertainties regarding electric mobility for the US, slow current demand leads to adjustments of OEM plans
- Moderate growth of overall car population expected over next 10-15 years
- Worldwide strongest annual sales share of ICE's expected by 2035:
- Growing share of PHEV's expected to last until 2035 and beyond, especially in rural areas; increased activities by OEMs
- MHEV & Fuel Cell: significantly reduced demand and low OEM invest
