Market Capitalization

Our target: Increase the absolute dividend amount each year or at least maintain previous year's level.

04 Appendix

Top 20 lubricant countries 2016

Regional per-capita lubricants demand 2016

Base oil / additives value split

- Base oil prices do not necessarily follow crude oil prices
- No direct link between additives and crude oil prices. We even face price increases for certain raw materials where supply/demand is not balanced or special situations occur
- Special lubricants consist of less base fluid and more additives

Workforce Structure

4,898 employees globally

Regional Workforce Structure

Functional Workforce Structure

Development passenger car production (in mn)

- **No market revolution expected:**
Evolution of existing technologies: Hybrids with efficient combustion engines will dominate the market
- Demand of EVs mainly in big cities with high traffic density

Source: IHS

Implication for FUCHS

Revolution – Complete switch to only EVs:

- No power train; reduced oil consumption
- New additional high value applications
- Sales per car would decrease slightly

Evolution – Mix of combustion, hybrid and electric engines:

- Efficiency requirements will drive demand for higher value applications
- Slightly lower volume of engine oils
- Additional applications for electric engines

Electrification is an opportunity for FUCHS to further strengthen its market leadership with technically advanced applications

Further market consolidation to be expected

- High degree of fragmentation
- Concentration especially amongst smaller companies

- Differences are enormous
