R&D expenses and Capex

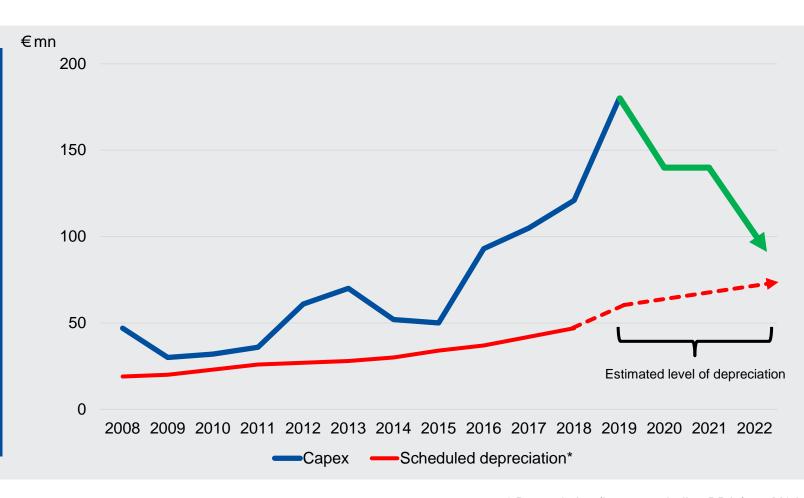

Investment initiative

Capex 2016-2021 €700+ mn

- In 2016 2018 over €300 mn capex was spent with focus on the expansion of Mannheim, Kaiserslautern and Chicago as well as new plants in China, Australia and Sweden
- Capex will peak in 2019 at €180 mn. In 2020/2021 more than €100+ mn p.a. will be spent on growth and replacement as well as efficiency improvements due to significant volume increases, technological changes and a changed product mix
- From 2022 onwards, capex should be back on par with the new level of depreciation

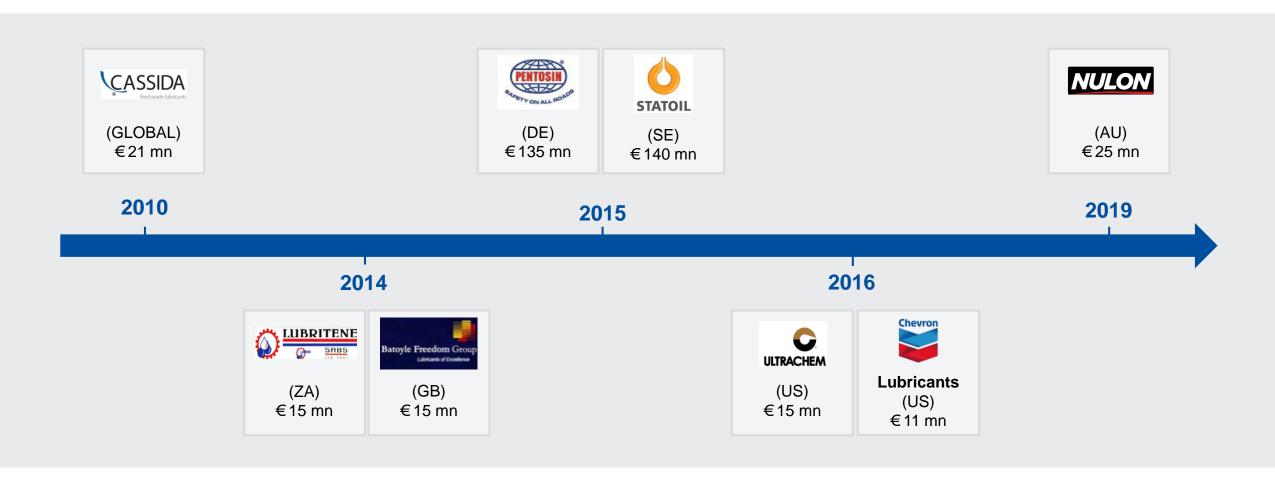

^{*} Depreciation figures excluding PPA from M&A

M&A deals > € 10mn sales (p.a.)

Highlights H1 2019

Sales -1% at €1,296 mn

- Growth initiative results in costs increasing as planned
- Continuing weakness of automotive markets in Germany and China
- Declining organic growth in North and South America in Q2

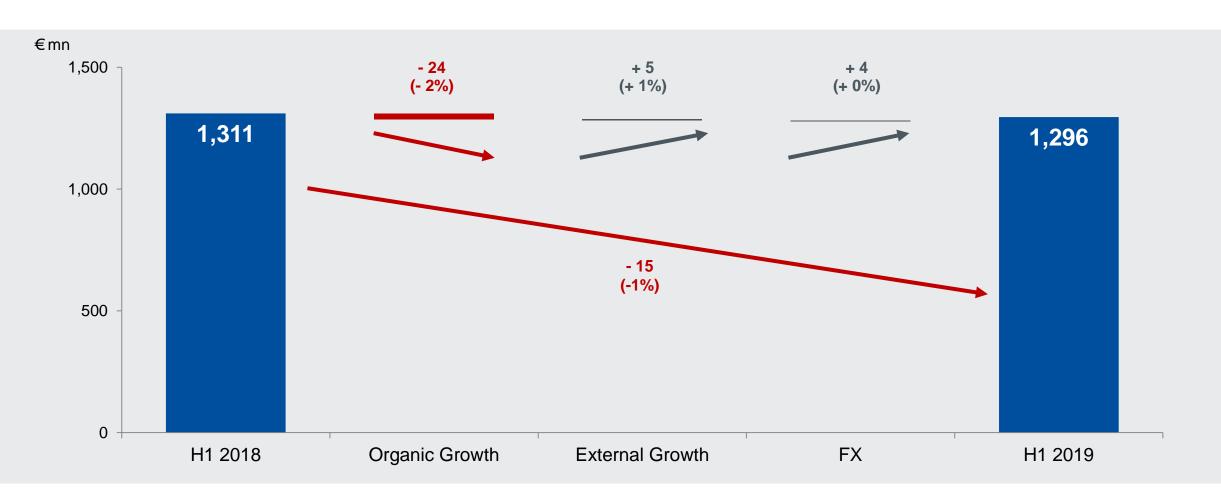

EBIT down by 19% to €157 mn

Outlook 2019 adjusted

- Sales -3% to +0%
- EBIT -30% to -20% (EBIT comparable: -27% to -17%)
- Free cashflow before acquisitions €70mn to €90 mn
- FVA €130 mn to €160 mn

- Decrease in sales in EMEA and Asia-Pacific mainly due to weakness of the automotive market in China and Germany
- North and South America in Q2 also with organic sales decrease
- Positive FX effects North- and South America (+4%) due to a strong US dollar, minor negative effect (-1%) in EMEA and no effect in APAC; External growth (+1%) in APAC due to acquisition of NULON
- Product mix changes and higher manufacturing costs (in particular staff and D&A) related to the growth initiative result
 in a decrease of gross profit by 5% to €441 mn (464). Gross profit margin decreases to 34.0% (35.4)
- Additional D&A and higher staff costs increase other function costs by €13 mn to €289 mn (276)
- EBIT therefore, combined with sales decrease, lower y-o-y at €157 mn (193); Earnings after tax at €112 mn (140), down by 20%

- Planned capex on record level (€180 mn) with focus on: Germany, China, Sweden, USA, Russia an UK

Breakdown ordinary & preference shares

(December 31, 2018)

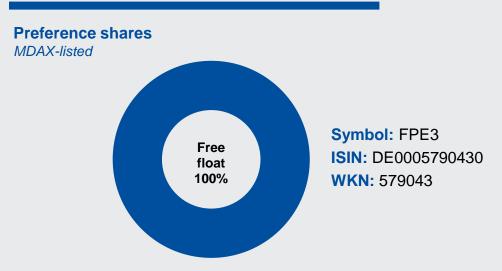

Basis: 69,500,000 ordinary shares

Characteristics:

- Dividend
- Voting rights

Basis: 69,500,000 preference shares

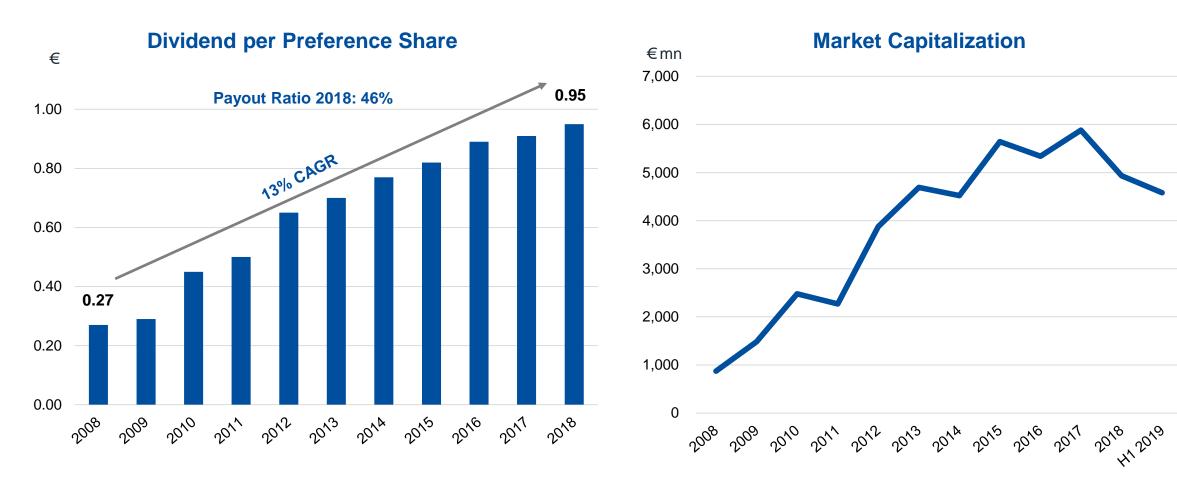

Characteristics:

- Dividend <u>plus</u> preference profit share (0.01€)
- Restricted voting rights in case of:
 - preference profit share has not been fully paid
 - exclusion of pre-emption rights (e.g. capital increase, share buyback, etc.)

Stable dividend policy

Our target: Increase the absolute dividend amount each year or at least maintain previous year's level

FUCHS2025 – Vision

Unique company culture with family roots and a strong value foundation. An independent, global thinking and agile company communicating free of hierarchies & practicing an open feedback culture.

Global alignment and communication with no friction within the matrix.

First choice for our global stakeholders: investors, employees, customers, suppliers etc.

High performance organization driven to continuously improve and adapt to technology and market changes.

Customer focus and proximity around the globe.

Sustainable and successful global business model.

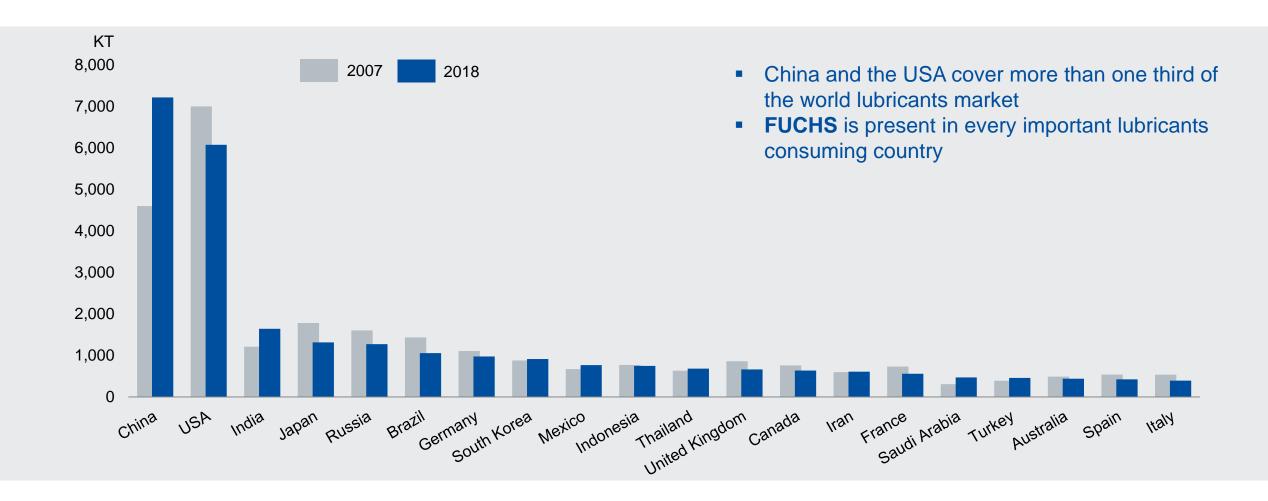

Know-how and state of the art technology linked with top service are a matter of course.

Act global

Based on our global standards and processes our employees act global while we keep the local entrepreneurship with strong local teams.

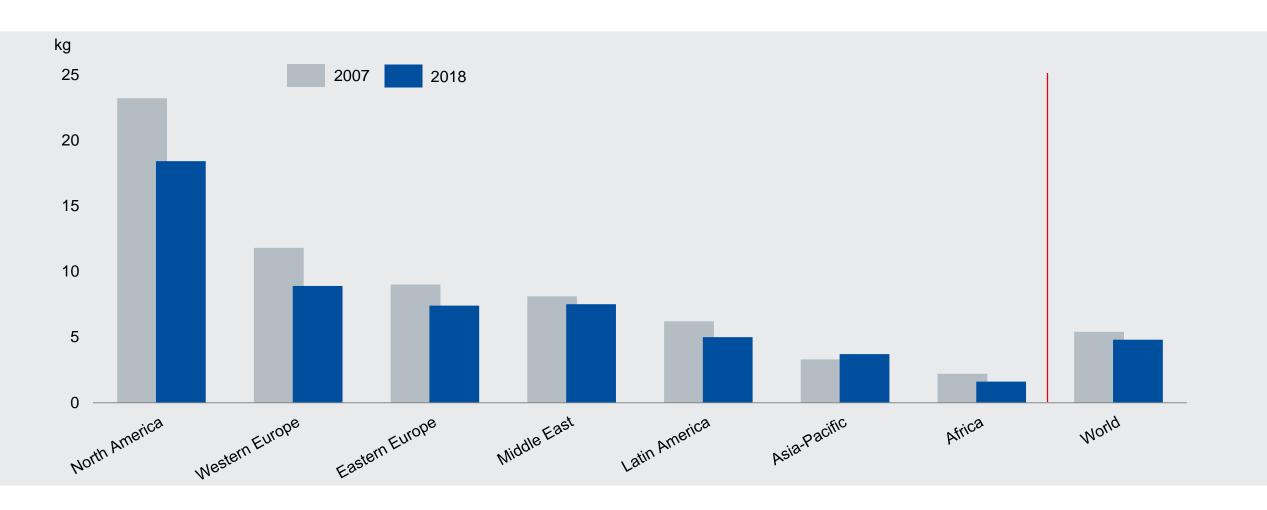

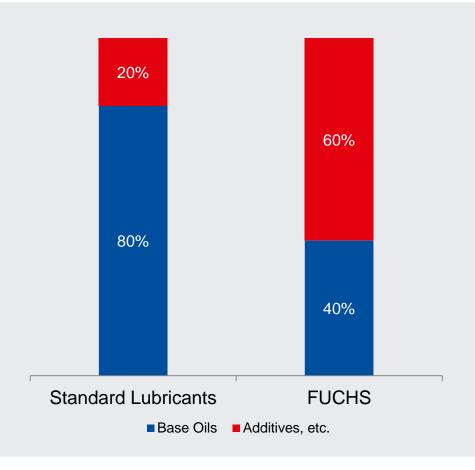

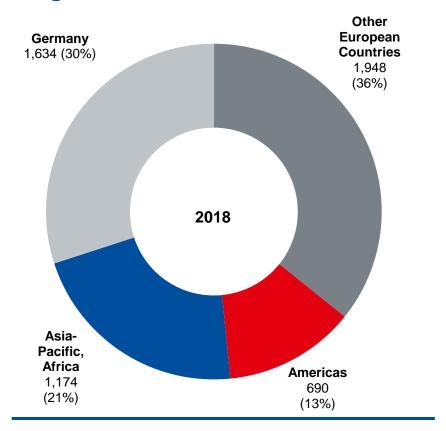

- Base oil prices do not necessarily follow crude oil prices
- No direct link between additives and crude oil prices. We even face price increases for certain raw materials where supply/demand is not balanced or special situations occur
- Special lubricants consist of less base fluid and more additives

Digitalisation will fundamentally change our value creation

- inoviga GmbH is a think tank outside the operative business
- Driving force behind digitalization projects
- Develops prototypes and tools for digital business models
- Current topics:
 - eCommerce
 - Digitalized product development & production
 - Smart Services

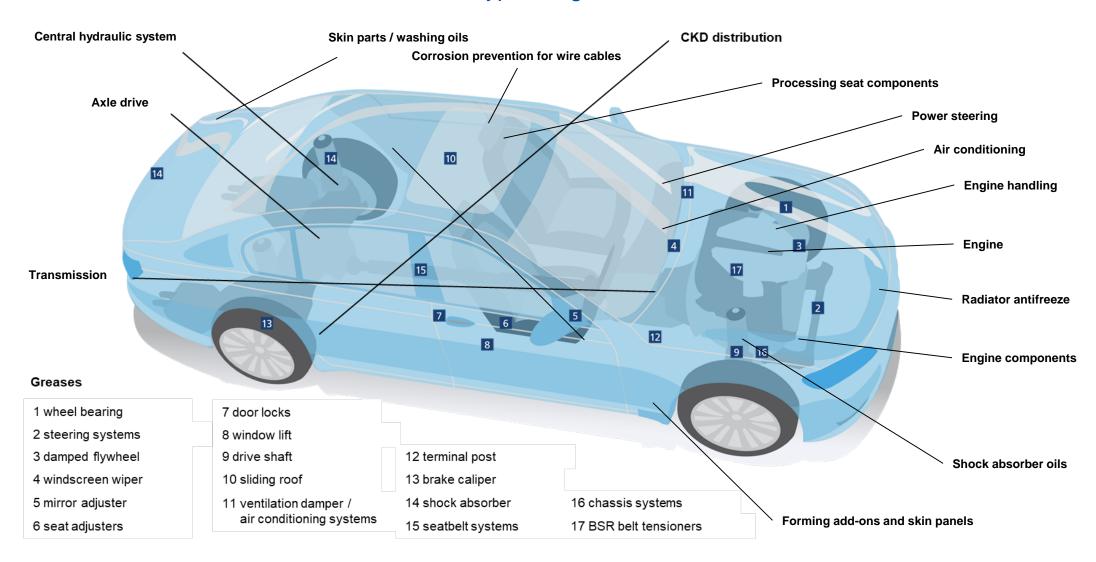

Electrification is an opportunity for FUCHS to further strengthen its market leadership with technically advanced solutions

- Electrification of cars will lead to new applications and higher requirements for existing applications
- Regardless of the powertrain type, every car needs a variety of other lubricant applications
- Combustion engines will face further efficiency improvements leading to higher requirements of existing lubricants (e.g. higher protection against deposits for turbocharged engines, higher heat and ageing stability for more compact engines)
- Hybrid cars with efficient combustion engines will place complex requirements for existing applications but also create new demand for new applications
- EVs will place whole new demand on gear oils, coolants, greases (e.g. contact with electrical currents and electromagnetic fields, higher heat emission, reduction gears with less gear steps and higher input speeds)
- FUCHS is used to quickly adapting to new market demands and is working on concrete methods to meet the challenges of the future mobility

Lubricant applications in passenger cars

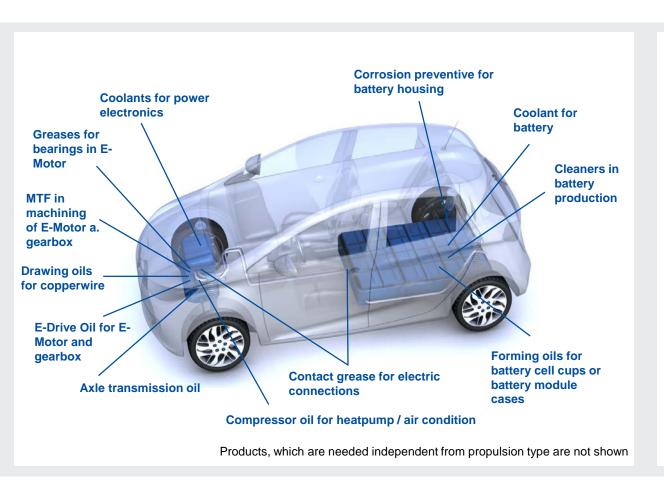

In modern cars there are more than 30 different types of greases
