

# ECOCOOL MG 22 B

MOVING YOUR WORLD

LUBRICANTS.  
TECHNOLOGY.  
PEOPLE.

High-quality, water miscible synthetic fluid that represents the latest generation of grinding and machining fluids.

Based on mineral oil-free technology using polymers that are fully water-miscible. ECOCOOL MG 22 B is specially designed for general machining and grinding operations (flat, tangential, centreless) on ferrous materials.

**LONGER  
PROCESSING  
FLUID  
SERVICE LIFE**

**TOTAL  
TRANSPARENCY**

**100%  
STABLE  
FLUID**

**CORROSION  
PROTECTION**

**HIGH  
COOLING PERFOR-  
MANCE**

## Increased productivity

- **LOWER maintenance**  
Low foaming
- **LOWER tooling costs**  
High lubricity
- **Totally TRANSPARENT**  
Allows you to see the surface of the processed parts
- **MINIMAL oil carry-over losses**  
Both in the chips and in the machined workpieces

## Increased efficiency

- **LONGER tool life**  
Guarantees minimum tool wear
- **Corrosion PROTECTION**  
Of machined parts, machine and filter tank
- **BETTER machine CLEANING**  
High detergent power
- Very LOW foaming  
Even at high working pressures (20 - 40 bar)

## Applications

### General machining

- Turning
- Milling
- Drilling

### Grinding of ferrous materials

- Flat
- Tangential
- Centreless
