

# ECOCOOL MS 200 BA

MOVING YOUR WORLD

High-quality, water miscible fluid that represents the latest generation of heavy-duty machining fluids. Premium quality.

Based on mineral oil-free technology, the synthetic lubricant compound provides excellent lubricating capacity and improves the sustainability of the process.

ECOCOOL MS 200 BA is specially designed for heavy-duty machining of steels and alloyed steels (Inconel, Duplex, Super Duplex and others), where high feed rates and machining speeds are required, as well as a superior surface finish (low roughness).

## Benefits

- **Excellent LUBRICATION**  
Formulated with a synthetic lubricant base, providing an excellent lubricating capacity
- **MINIMAL oil carry-over losses**  
Both in the chips and in the machined workpieces
- **Very LOW foaming**  
Even at high working pressures (20 - 40 bar)
- **Good corrosion PROTECTION**  
Of the processed parts as well as of the machine and the filter tank
- **EXCELLENT detergent capacity**  
Minimal carry-over consumption rate on machined parts

## Applications

- Turning
- Milling
- Drilling
- Threading
- Reaming

### Material to be machined

- Steels
- Alloy steels
- Titanium

**LONGER  
TOOL SERVICE  
LIFE**

**LOW  
MAINTENANCE  
COST**

**EXCELLENT  
LUBRICATING  
POWER**

**HIGH  
COOLING  
PERFORMANCE**

**EXCELLENT  
CORROSION  
PROTECTION  
FOR STEEL**
