

ECOCOOL SSYN 130 ECOCOOL SSYN 514

MOVING YOUR WORLD

New range of fully synthetic, water miscible fluids with excellent lubricating properties for heavy-duty machining.

ECOCOOL SSYN 130 for steel, cast iron, stainless steel, Duplex, Inconel.

ECOCOOL SSYN 514 for aluminium alloys commonly used in the automotive industry.

Completely mineral oil-free technology using lubricant additives that are fully water miscible.

Benefits

- **Greater SUSTAINABILITY**
Completely free of mineral oil
Based on synthetic lubricant additives
- **Very LOW foaming**
Even at high working pressures (20 - 40 bar) and in water with low calcium hardness
- **High LUBRICATING POWER**
Ideal for use in all types of machining operations
- **LOW consumption**
Due to its good wetting properties and low surface tension leading to less contamination of subsequent degreasing baths
- **Corrosion PROTECTION**
Of machined parts, machine and filter tank
- **FILTRATION**
Suitable for any filtration system, including precoat filters

Applications

Ferrous metals ECOCOOL SSYN 130

- Turning
- Milling
- Drilling
- Threading

Aluminium ECOCOOL SSYN 514

- Milling
- Reaming
- Drilling
- Threading
