

IN PARTNERSHIP WITH THE **MARINE INDUSTRY**

FUCHS is the world's largest independent lubricant manufacturer, supplying superior products and services to many diverse market sectors. Included in our portfolio is our range of marine oils to help keep machinery working at optimum efficiency, delivering reliability and performance.

FUCHS products are already used and trusted throughout the marine industry by The Royal Navy, Fisheries Protection Vessels, fishing trawlers as well as in personal watercraft.

Working in partnership with trusted local distributors, we provide:

- High performance products
- Products which carry approvals and recommendations
- Technical service
- Local support and assistance
- Locally stocked products for increased availability

PRODUCTS YOU CAN RELY ON

FUCHS' comprehensive portfolio includes products for a wide range of applications including engine oils, gear oils, hydraulic oils as well as specialist lubricants. For information on the complete range, please contact your local distributor; below are just some of the FUCHS marine lubricants:

TITAN MARINE ENGINE OILS	Heavy duty multi-grade and monograde engine oils	Developed to meet the lubrication requirements of high performance diesel engines, turbo charged and naturally aspirated, operating under severe conditions. Ideally suited for use in stationary engines, generator sets and certain marine diesel engines, particularly where fuels of higher sulphur level may be used.
TITAN GEAR OILS	Heavy duty marine and automotive transmission oils	A range of heavy duty lubricants developed to meet or exceed internationally recognised specifications and classifications. Includes active anti-foam agents to reduce incidence of damage due to air entrainment during use.
RENOLIN B HVI OILS	EP lubricating and hydraulic oils	High quality products used as hydraulic oils and as lubricating oils for various applications such as bearings and gear boxes, where high viscosity index and good load carrying capacity are required. Especially recommended for applications where a low start-up viscosity at low temperatures and a higher viscosity at higher temperatures is required.
RENOLIT MARINE GREASES	High quality, water resistant grease	For lubrication and protection against corrosion of mechanisms submerged in seawater or subject to wave action and the washing effect of heavy seas. We have products manufactured to DEF STAN 91-34/1 and NATO G-460
AQUA 2	2-stroke oils for leisure water-craft	A synthetic blend, very low smoke oil formulated for all marine 2-stroke engines operating under normal conditions. Ideal for use in engines which are used seasonally or infrequently as it leaves a coating which prevents corrosion on all internal surfaces.
RENOCLEAN FLUIDS	Cleaning and degreasing products	Heavy duty cleaning and degreasing fluids for fish rooms, decks and general marine applications.

Many of our products carry approvals and specifications - please contact your local distributor for more information.
