

## The complete service solution

## Enhance your service. Enhance your workplace.

Expert support in fluid supply, distribution, monitoring and maintenance. Our lubricants, together with our service support options, are geared towards benefiting your company - helping build a valuable maintenance programme.

High performance lubricants keep your operations running whilst our advanced monitoring tools, together with unrivalled technical support, remove any unwanted surprises before they happen.

Our team of fully trained technical staff and engineers are on hand to implement bespoke service packages across your site or to simply assist with any product or application enquiry.

FUCHS also offers various tools to help with the application, storage, monitoring and analysis of your products and equipment to help you identify issues, react quicker and reduce costly downtime.

From digitised tank telemetry, to real-time fluid reporting, the FUCHS Smart Service Team is fully equipped to help your operations run smoothly and efficiently, saving you time and reducing your costs.

**FUCHS Smart Service.**  
Reliability Support.

### FluidsConnect

- Individually designed dashboards
- Track & trend fluid conditions
- Remote real-time access to key operating data
- Eliminates unforeseen production problems
- Assists in preventative maintenance planning
- Reduces fluid consumption & expenditure

## The complete service solution.

### Tailor-made packages to suit all of your business needs

**HSE compliance**  
Ensure your lubricants & lubrication processes meet regulated standards for safety and correct use.

**Stores management**  
Clear, clean, labelled on-site storage with monitored stock levels to aid with effective stock rotation and rationalisation.

**Process optimisation**  
Our Technical Team will ensure lubricant processes are maximising efficiency by streamlining unnecessary processes.

**Training**  
Bite-sized toolbox talks through to full in-depth subject specific technical and product training.

**Equipment support**  
Existing lubrication equipment is assessed and bench marked before improvement plans are outlined.

**Fluid analysis**  
Equip machinery and distribution points with sensors to best monitor the flow and condition of your lubricants.

**Fluid control**  
FUCHS help establish correct lubricant management and testing techniques that aid towards HSE Compliance.

**Predictive maintenance**  
Analysis of machine and lubricant data trends can aid proactive planned services by identifying wear and other issues.

**Smart data capture**  
Real-time information can be accessed using FUCHS FluidsConnect web-based digital platform.

**Waste minimisation**  
Efficient processes using correct lubricants and recycling schemes will result in lower waste disposal costs.

**Document management**  
We can ensure all legal and H&S product documentation is up to date and accurate.

**Environmental support**  
Recycling schemes and safe/approved waste collection in line with current regulations.
