Supporting Our Customers

We believe providing the right service and support is just as important as providing high quality lubricants. We provide a technical help line for all our customers and supply customers with a tailored service package to meet their individual requirements. Site surveys, assistance with LCCP audit compliance and training of personnel are just some of the services we offer.

- Our dispensing and storage solutions assist customers with best lubricant practices and meeting audit requirements.
- To aid identification, we are able to supply colour coded aerosols, grease cartridges and grease nipple covers.
- Dispensing pumps, grease guns and Oil Safe containers can be supplied to customers to facilitate ease of usage.
- We can conduct a full site survey providing you with a lubrication audit compliance manual containing all of the data sheets, NSF certificates and other essential information.

Dispensing And Storage Solutions

- Robust lever pumps provide easy dispensing, with no wastage.
- Oil Safe containers which fit onto the CASSIDA LUBE CENTRE for pumping from the kegs to the containers with no spills.
- Product specific labels for the Oil Safe containers for ease of identification.
- Efficient dual handled grease gun specifically for the food, beverage and pharmaceutical industries.
