

Calcium Sulfonate Complex Greases

Ensuring Equipment Reliability & Longevity
for the Food & Beverage Industry

Products

Food and beverage processing equipment faces constant challenges from extreme temperatures, high moisture, and heavy loads. Using the right lubricants helps ensure continuous operation to avoid costly downtime. Our calcium sulfonate complex greases are engineered to deliver superior protection under the harshest conditions.

CASSIDA GREASE GTX 400-2 | CASSIDA GREASE GTM 2 | FM GREASE CSC EP 1 & 2

Features

- Exceptional thermal & mechanical stability
- Superior corrosion & moisture resistance
- Excellent EP & anti-wear performance

Benefits

- Extend Maintenance Intervals
- Reduce Downtime & Consumption Costs
- Prolong Equipment Life

Why Choose FUCHS?

Industry-Leading Expertise

Backed by years of experience and a commitment to innovation, we understand the specific lubrication needs of the food and beverage industry.

Tailored Support

Our technical team works with you to identify the best solutions for your maintenance challenges, ensuring the right grease for the job.
